

“When you find a lost phone ”

For the first meme I said “ when you find a lost phone” normally people look at the home screen or try to get in the phone to see who it belongs to but in the photo it was stuck on the lock screen.it also has something to do with cybersecurity because your trying to get into the phone.

“When you and your friends learning something new but bored”

For the second meme i said “ when you and your friends are learning something new but bored ” i say this because in the picture its a couple of people that have their head rested on there hand and people taking notes.

“When you and you're group finish the group project and passed it”

In the last meme I said “when you and your group finish the group project and passed. This is similar to cybersecurity because in the work field some jobs require group work and after you finish it you will be happy and excited.
