8. Course Feedback

Client Overview

Earth Viability Center (EVC) is an organization aiming to provide individuals around the world with ways to communicate, share information, and discuss global issues. The organization's main role is maintaining their website Place4Us.net.

Dr. Hans-Peter Plag was our contact at Earth Viability Center, as a founder of the organization and the individual in charge of all technical aspects, such as coding the website.
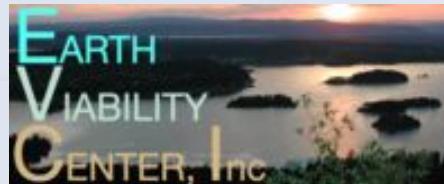

Client Engagement

We communicated with our client, EVC, every week by attending their organizational meetings with their cybersecurity interns, as well as additional communication when necessary.

Project Evaluation

If we could do this project again, we would be more proactive in communicating with our client and establishing our plans in exactly how we were going to complete the project.

Team Dynamics

One way we could have improved is by implementing more redundancy in our roles, such as having multiple people attend meetings, in order to ensure we were gathering the proper amount of information.
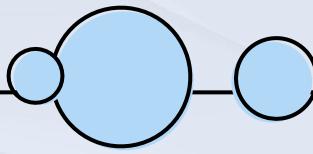

Highlights of Project

➢ Learning more about Earth Viability Center

➢ Actually having first hand experience as a consultant and analyst

➢ Working with our team members and building connections with one another

Course Highlights

Our group really enjoyed all of the guest speakers throughout the semester, and they all gave us incredibly valuable information, both for our work in this clinic and in the future.

➢ Dr. John Baaki
➢ Kristen Stephen
➢ Genevieve Marquardt

Recommendations for Future Teams

We would recommend for future teams to

➢ Establish a plan and outline for things like communication

➢ Work on the report as early as possible and as you gain information from your client.

➢ Ask your client what their ideal communication looks like.
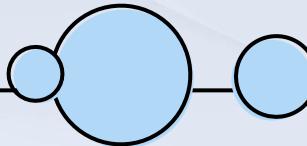

📝 Course Feedback 📝

We really enjoyed this course and the opportunity to gain experience in the cybersecurity field, as well as the ability to work with and help actual organizations.

Suggestions for the future could include having clients communicate both with students and with TAs of the course frequently, to ensure that they don't have any concerns that aren't being addressed and have a good understanding of the clinic.
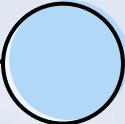

Thank You!

Team Earth Viability
