

Assignment 2

Bradley Hamilton
02/02/2025

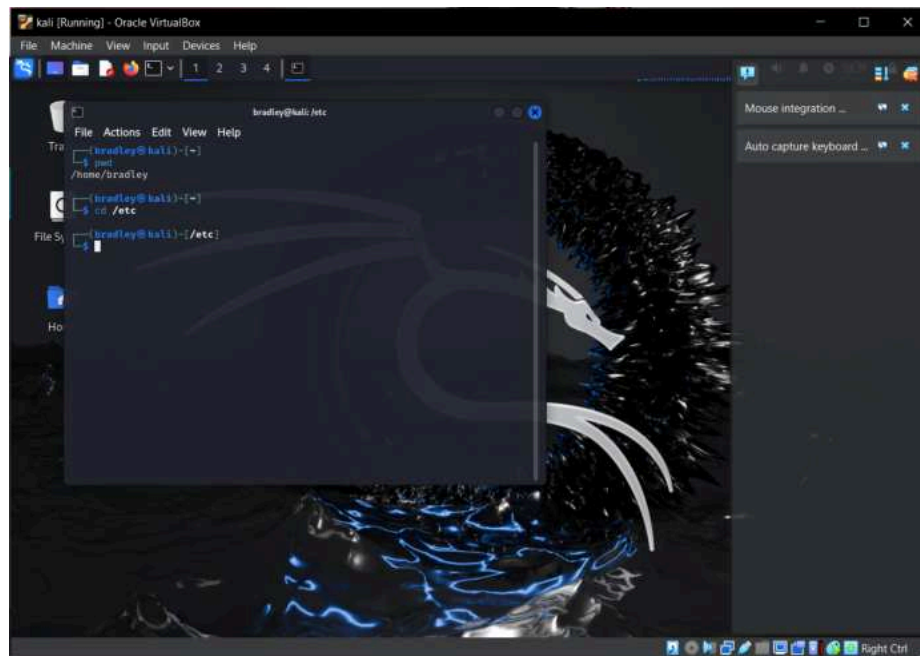

Step 1:

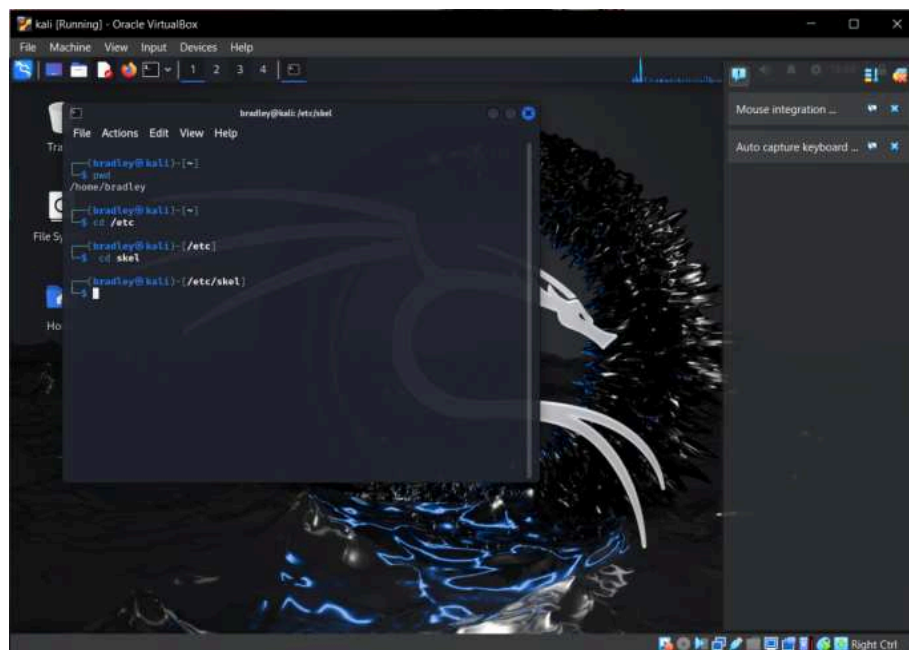

Step 2:

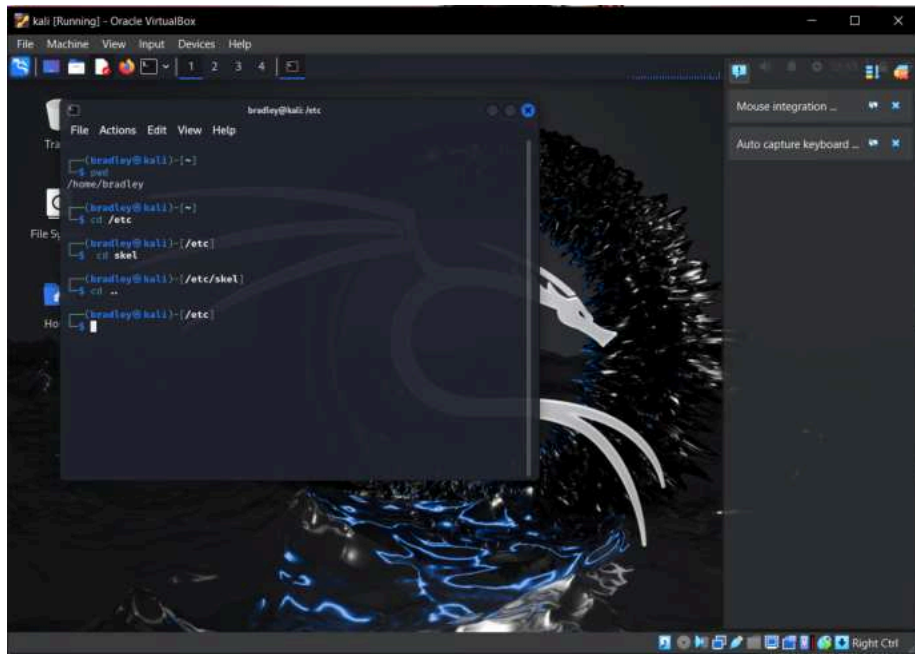

Step 3:

Step 4:

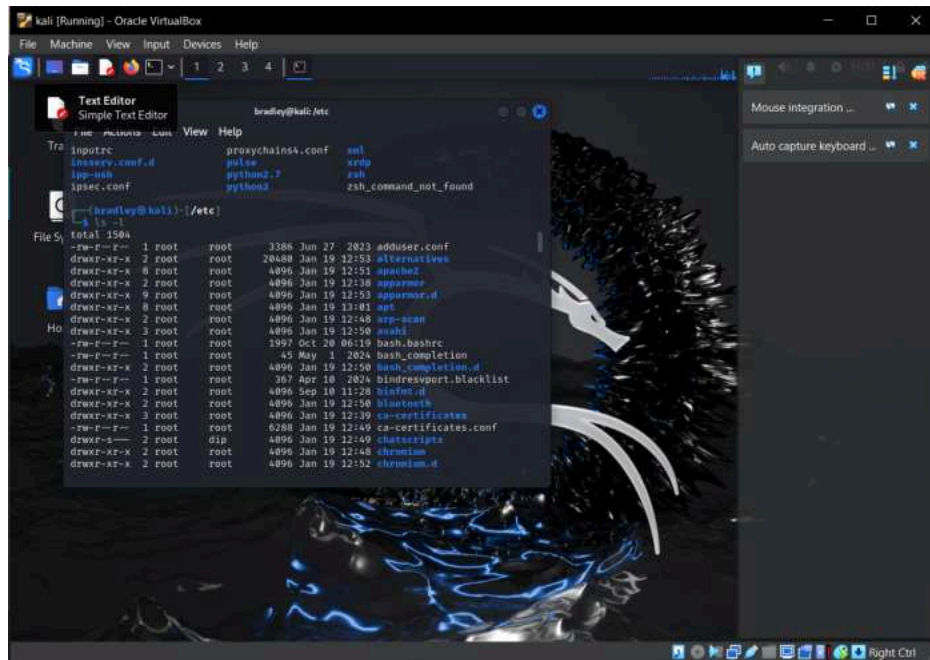

Step 5:

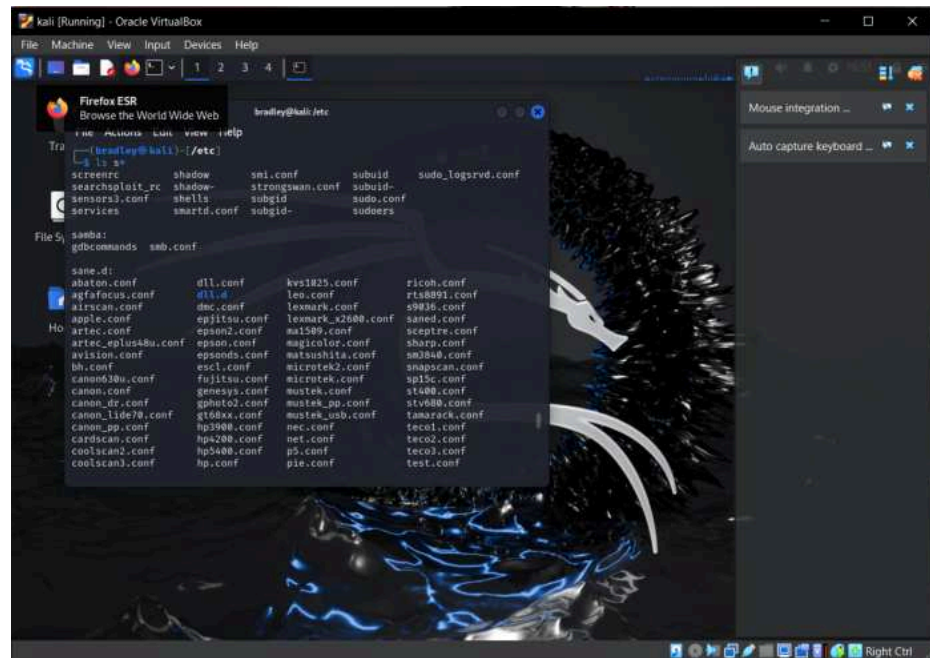

Step 6:

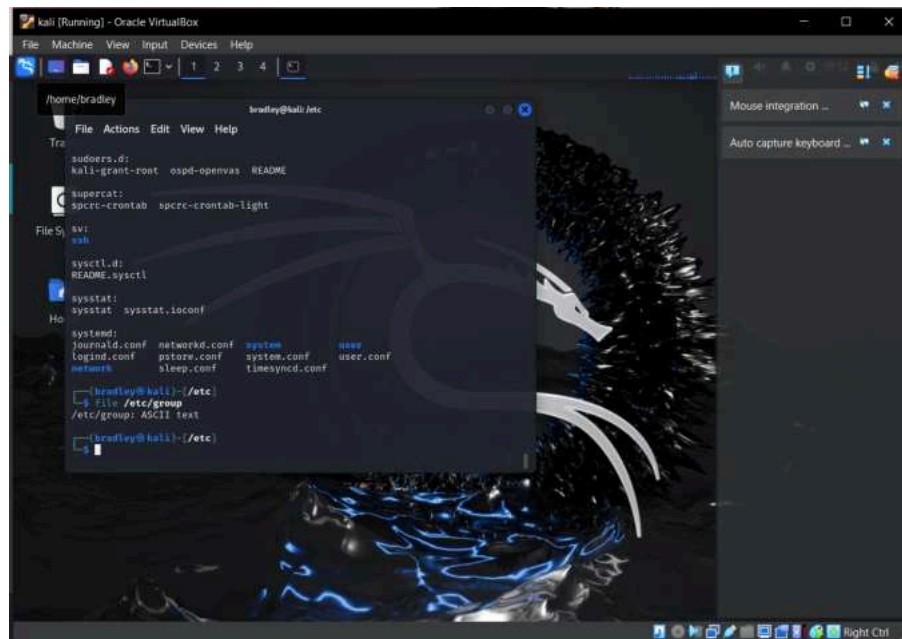

Step 7:

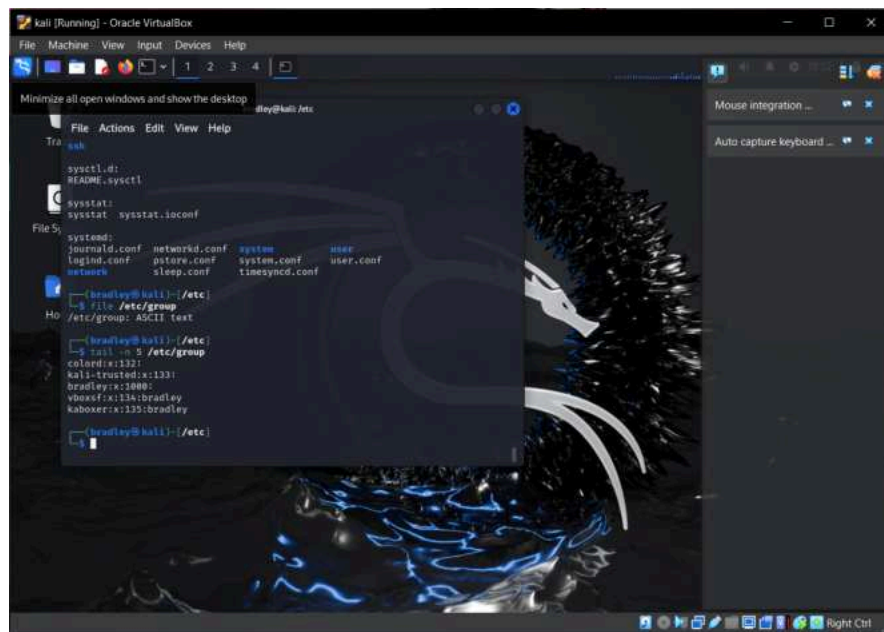

Step 8:

Step 9:

Step 10:

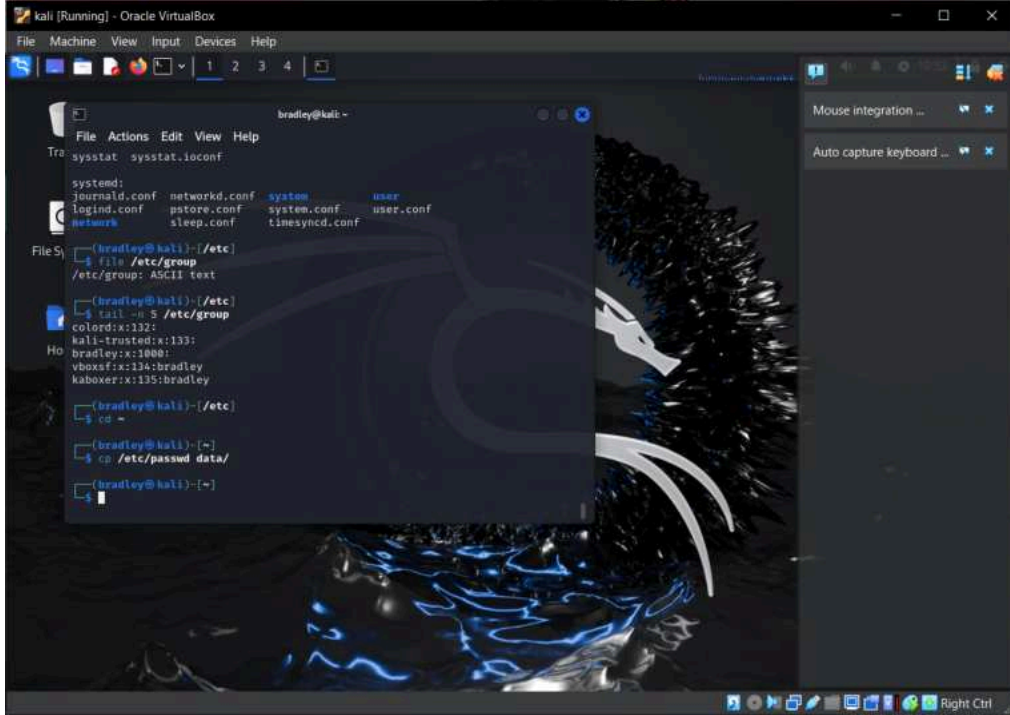

Step 11:

```
bradley@kali:~$ cd /etc
bradley@kali:~/etc$ ls
README.sysctl  sysstat  systemd  journald.conf  networkd.conf  system.conf  user.conf
login.conf     pstore.conf  system.conf  user.conf      networkd.conf  sleep.conf   timesyncd.conf
bradley@kali:~/etc$ tail -n 5 /etc/group
color:x:132:
kali-trusted:x:133:
bradley:x:1000:
vboxsf:x:134:bradley
kaboxer:x:135:bradley
bradley@kali:~/etc$ cat /etc/group
```

Step 12:

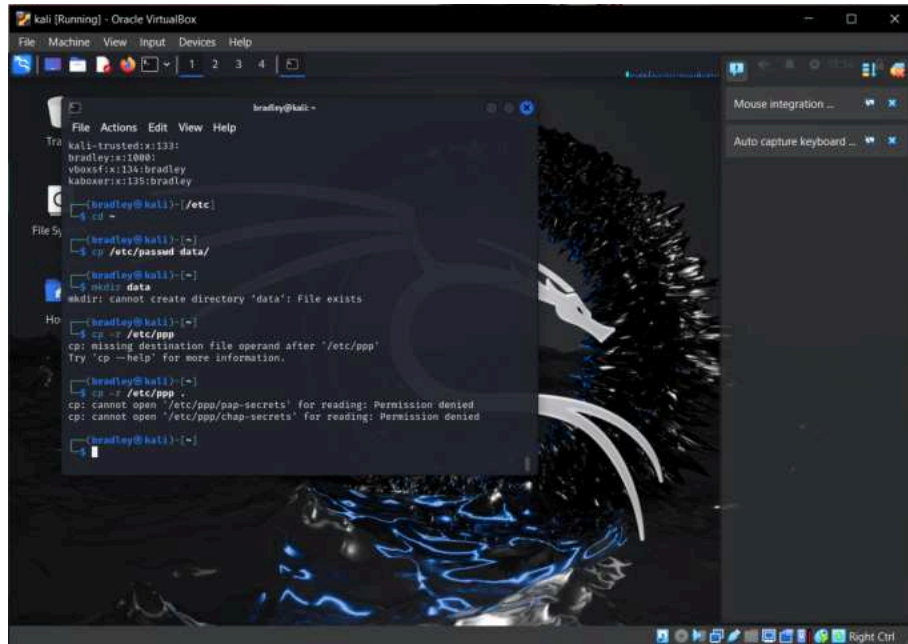

```
bradley@kali:~$ cd /etc
bradley@kali:~/etc$ ls
login.conf  pstore.conf  system.conf  user.conf
networkd   sleep.conf   timesyncd.conf
bradley@kali:~/etc$ cat /etc/passwd
color:x:132:
kali-trusted:x:133:
bradley:x:1000:
vboxsf:x:134:bradley
kaboxer:x:135:bradley
bradley@kali:~/etc$
```

Step 13:

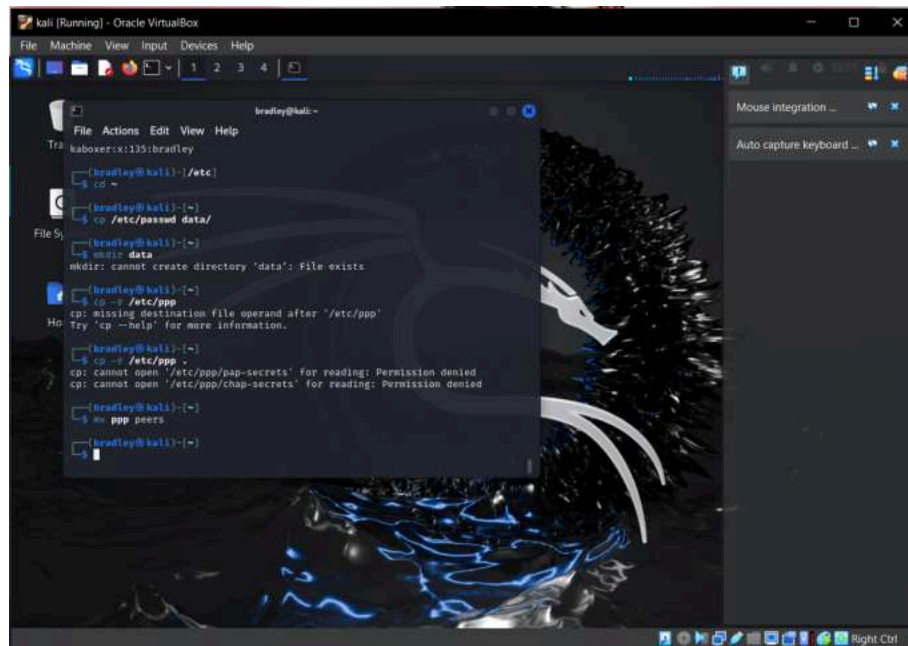

**** Data was done on a previous attempt and I redid these because I was getting permission errors so I executed cp and made the mkdir data for screenshot continuity, but commands were done out of order.*****

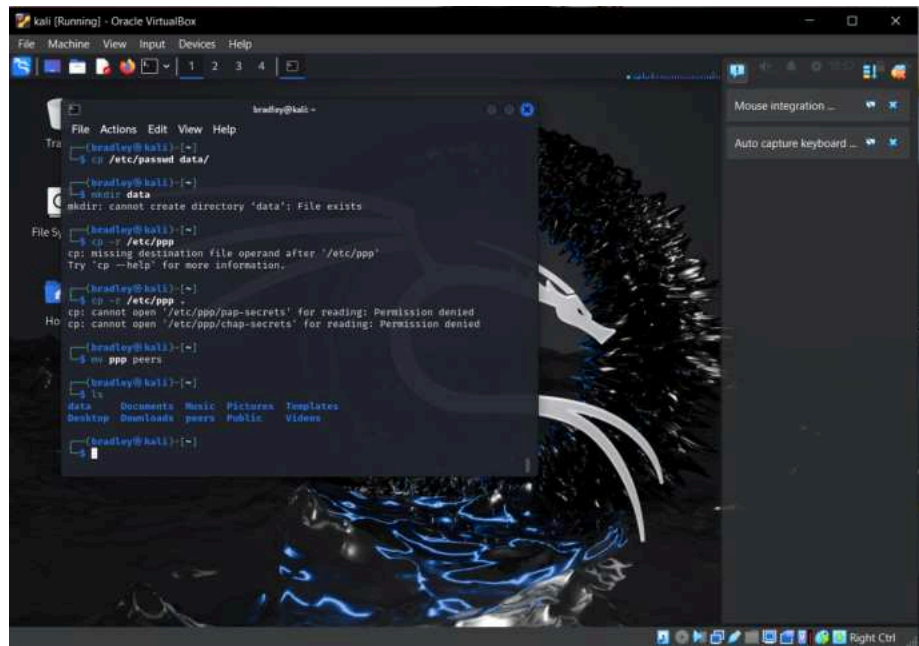

Step 14:

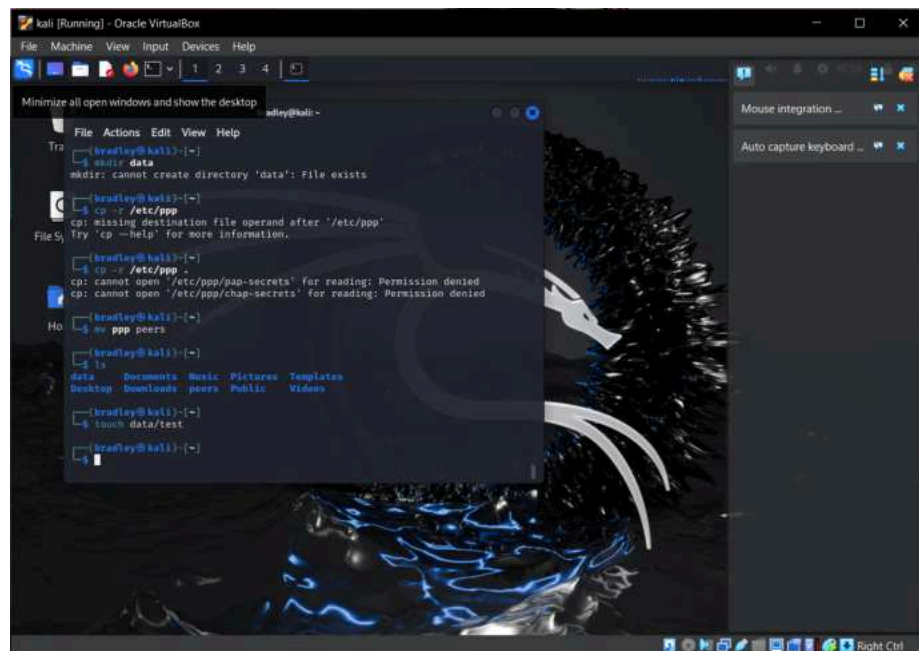

Step 15:

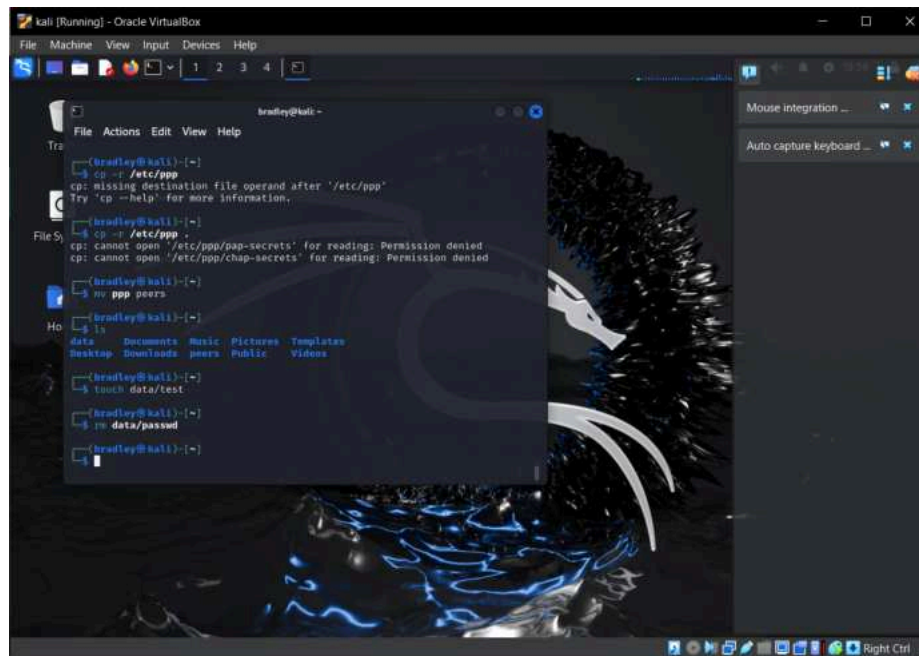

Step 16:

Step 17:

Step 18:

```
bradley@kali:~$ cp -r /etc/ppp .
cp: missing destination file operand after '/etc/ppp'
Try 'cp --help' for more information.

bradley@kali:~$ cp -r /etc/ppp .
cp: cannot open '/etc/ppp/pap-secrets' for reading: Permission denied
cp: cannot open '/etc/ppp/chap-secrets' for reading: Permission denied

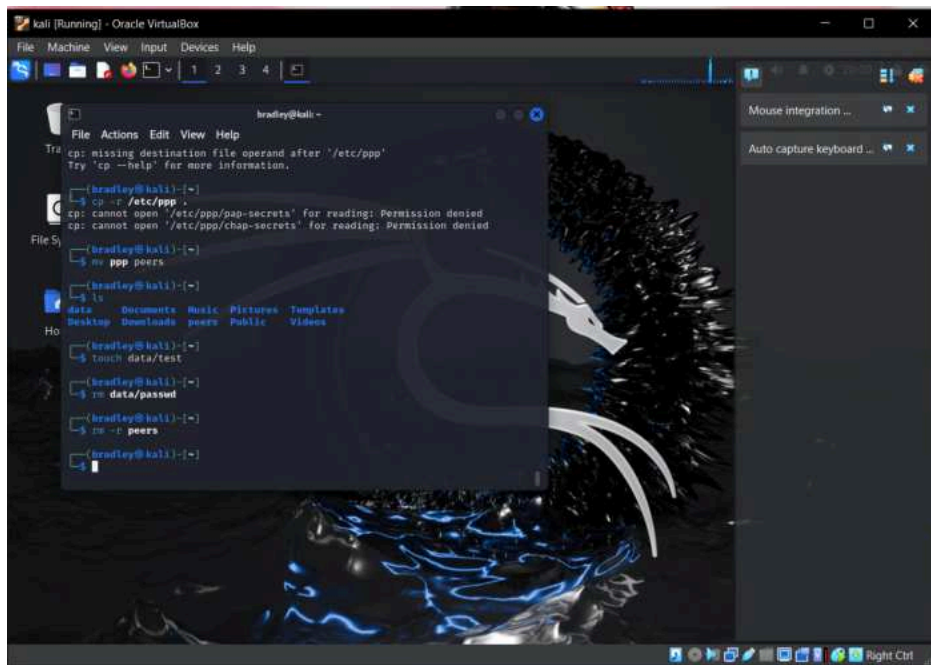

bradley@kali:~$ ls peers
ls
data

bradley@kali:~$ touch data/test

bradley@kali:~$ cp /etc/passwd data/passwd

bradley@kali:~$
```

Step 19:

Step 20:
